## Quick Start Guide

Elinx Gigabit Ethernet Switch EIR408-T

Items Included

- Ethernet Switch
- CD with Support Manual
- This Quick Start Guide
- Panel Mount Bracket

Hardware Installation

1. Select a mounting location and install the switch onto a piece of DIN rail or use the included panel mount brackets for wall or panel mounting
2. Connect power to the switch

- 12 to 48 VDC
- If redundancy is desired be sure to
connect two separate power supplies by using the two DC inputs on the terminal blocks
- If only one power input is used the Fault

LED will light (this is normal)

| LED | Description |  |
| :--- | :--- | :--- |
|  | Green | Power input 1 is active |
|  | Off | Power input 1 is inactive |
| P2 | Green | Power input 2 is active |
|  | Off | Power input 2 is inactive |
| Fault | Red | Power input 1 or 2 is inactive |
|  | Off | Power inputs 1 and 2 are both active, <br> or no power is present |
|  | Green | Connected to network |
|  | Flashing | Networking is active |
|  | Off | Not connected to network |
| Copper Port <br> (Lower LED) | Green | Connected to network at 1000Mbps |
|  | Off | Not connected to 1000Mbps network |

## Ports

RJ-45 ports: The RJ-45 ports auto-sense for 10, 100 or 1000 Mbps devices connections. The auto MDI/MDIX feature allows connections to switches, workstation and other equipment without changing straight through or crossover cabling. The charts below show the cable pin assignments

1. Auto MDI/MDI-x is supported. A straight through or cross-over cable may be used.
2. 10/100/1000 auto negotiation and full/halfduplex are supported.

is applied, installation is complete.
3. The switch will automatically discover network devices, populate its MAC address table, and pass traffic to the appropriate ports.
